

Furniture Systems

Chairs, Tables, Cabinets, Beds (Frame only),
Footstools...You Name It!

All want a comfortable and cozy coat. BIOFA has a system for everything!
These include products that are:

- Solvent free, non layer-forming oils (see below for explanation)
- Layer-forming oils in three finishes
- Primers for cabinet interiors
- At least over 17 exquisite standard colors and countless marvelous possibilities

Solvent free oils for wooden furniture and countertops ...

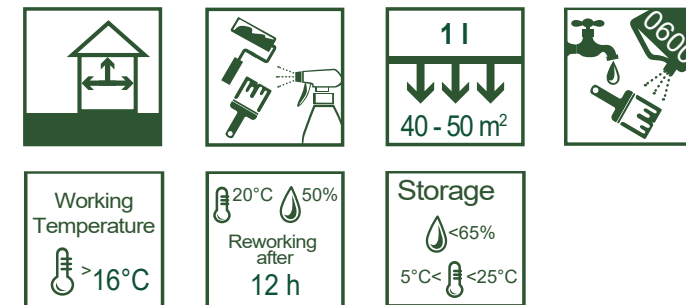

Furniture Oil 2049 and
Worktop Oil 2052

- Silky gloss finish
- Breathable surface for a healthy indoor environment
- Sweat and saliva resistant
- Water and dirt repellant
- Conforms to the international toy standard N 71/3
- 97% renewable and mineral ingredients

These oils can develop a persistent odor in enclosed spaces and should not be used inside drawers, cabinets, boxes, etc. See Wood Enhancer 5005 below.

Where to use:

Furniture and Worktop Oils are perfect treatments for priming, finishing and maintaining exposed furniture surfaces, paneling and toys.

Furniture Oil contains wax and forms a silky finish. Worktop Oil has more oils and resins that make it more durable for plates, pots and pans and the occasional dropped knife.

Oil from Nature ...

Solvent free oils are Non Layer-Forming and require a coarse pad (green) to work the oil into the wood. They saturate the wood surface, but remain a thin layer. Non Layer-forming surfaces are more easily repaired where needed. They yield durable, open-pored surfaces.

The solvent free BIOFA Furniture Oil and BIOFA Worktop Oil were developed by engineers, who love to prepare their food on wooden countertops! The natural oils and waxes in these products are cooked in our proprietary process to provide exceptional durability, dirt- and water repellant and elastic properties. 2052 complies with both the EN 71.3 toy standard and the DIN 53 160 saliva and sweat resistance standard, as well as the EC No. 1935 food fastness regulation.

Oil from Nature ...

BIOFA Color Oil Non Layer-Forming Primer

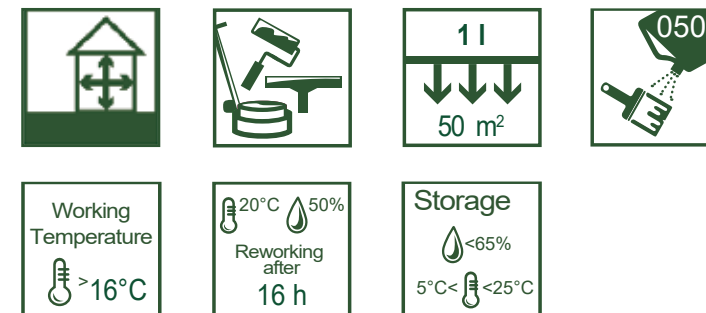

for beauty treatment with BIOFA Hard Oil 2044 or BIOFA Hard Wax Oil 2033 and 2055

- Colored primer in harmonic natural colors
- Durable surface for all furniture
- Sweat and saliva resistant
- Breathable surface for a healthy indoor environment
- 96% renewable and mineral ingredients

These oils can develop a persistent odor in enclosed spaces and should not be used inside drawers, cabinets, boxes, etc. See Wood Enhancer 5005 below.

Where to use:

BIOFA Color Oil is a perfect primer for subsequent treatment with the more durable Hard Oils or Hard Wax Oils, or can be the topcoat for gently handled surfaces.

Standard Colors

Hundreds of colors available upon request (see BIOFA Color Card Samples)

Oil from Nature ...

Layer-Forming Oils are particularly durable and resemble a varnished surface in appearance and feel. Like all BIOFA products, layer-forming oils are open-pored and allow the floor to breathe and enhance the room environment. They are easily applied with brush, roller or sprayer. These layer-forming oils from BIOFA were developed by engineers with active children for durability and a healthy environment. The natural plant ingredients bring a living aura to a functional floor. The waxes are dirt and water repellent. The elastic oils help protect the wood. The three finishes, together with many priming options, offer an almost limitless range of effects. These products will satisfy your needs.

The Layer-Forming Oils in 3 lovely finishes

Hard Wax Oil mat 2033
Universal Hard Oil semi mat 2044
Hard Wax Oil semi-gloss 2055

BIOFA offers three different finishes to suit your pleasure: matt 2033, silky matt 2044 and silky gloss 2055.

- Made with natural and renewable materials
- Low emission for a healthy room environment
- Resists sweat and saliva
- Repels dirt and water
- Low propensity for yellowing

Where to use:

These three oils are suitable for wood, cork, plywood and other absorbent materials.

To add beautifully living colors to the surface, prime them with BIOFA Color Oil 2110 before applying the layer-forming oil.

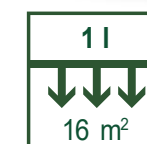

These oil can develop a persistent odor in enclosed spaces and should not be used inside drawers, cabinets, boxes, etc. See Wood Enhancer 5005 below.

Furniture Systems

BIOFA Wood Refiner based on shellac

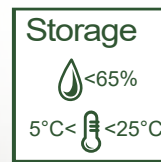

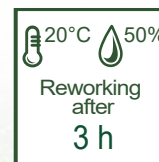

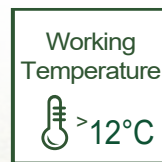

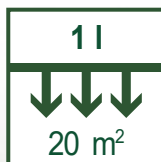

The natural oils and resins in the previously described products can leave a persistent odor in enclosed spaces. To avoid this, BIOFA has developed Wood Enhancer 5005. This solvent-free non layer-forming oil consists of 100% renewable and mineral ingredients that do not develop such odors.

- Low emission for a healthy room environment
- Quick drying
- Evens out light irregularities in the wood appearance
- Complies with the international toy standard EN 71/3

Where to use:

For the insides of drawers, cabinets, boxes, and other enclosed spaces.
