- for terraces, garden furniture and facades

BIOFA - the green standard

BIOFA Philosophy

The healthiest and most environmentally friendly colours and oils are those that are produced in a healthy, responsible and sustainable way. This is the basis of BIOFA's philosophy, because healthy living is not a luxury.

We spend 80% of our daily lives indoors. Without a healthy indoor climate, a healthy and active life is not possible.

We show our customers the composition of our natural colors on a special full declaration.

Active environmental protection

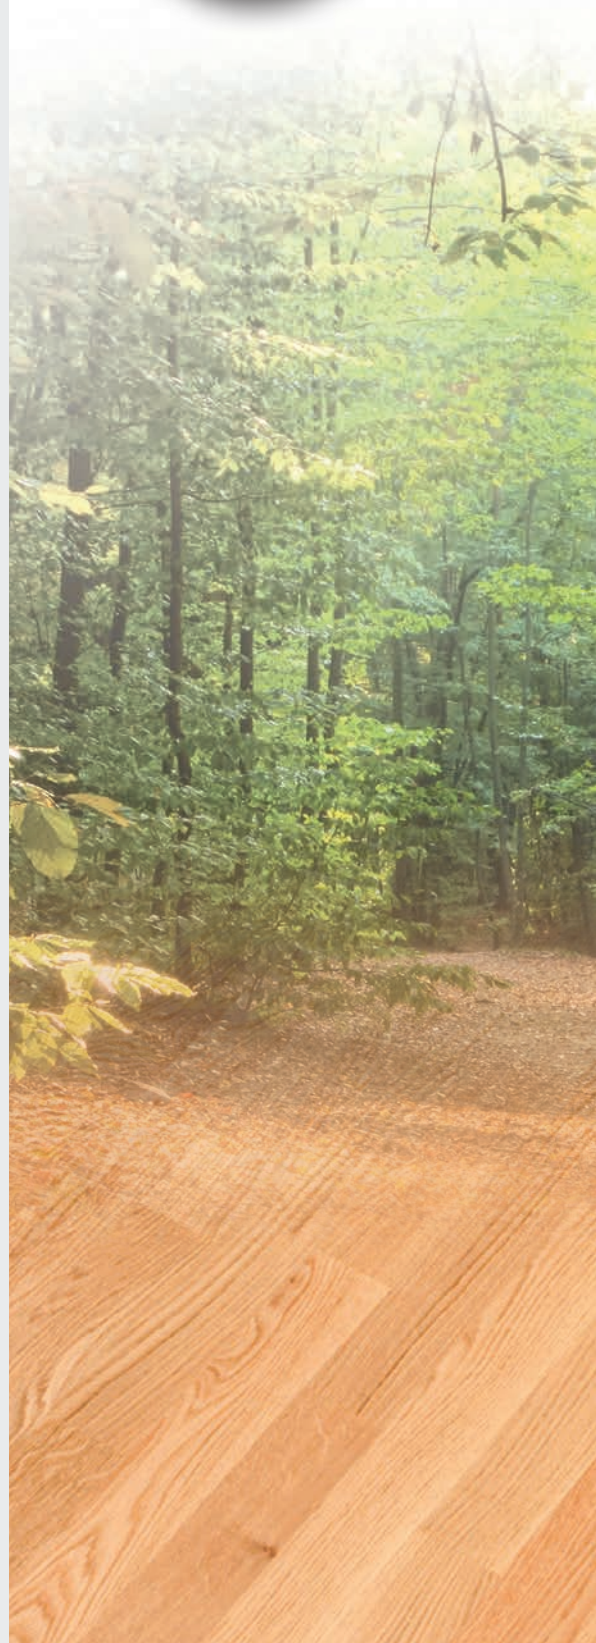

Natural products protect the environment. They have the following advantages over synthetically manufactured products:

1. They are made from renewable raw materials
They are produced in an environmentally friendly way
2. No toxic substances need to be used for preservation or against skin formation
3. Natural paints have a natural degradation effect outdoors and do not release any toxic substances into the groundwater.

Quality of the products

BIOFA uses clean raw materials from nature that grow back on their own. From the raw material to the end product, all products undergo strict internal BIOFA tests in the laboratory and in the application technology department.

Only regular tests can guarantee lasting quality.

Priming with Universal Wood Primer 3754

BIOFA Universal Wood Primer is a quick-drying primer for all interior wood, cotto tiles and highly absorbent stone tiles. Thanks to its natural composition of linseed oil, the hard primer provides optimum saturation of the substrate before further coats of Universal Hard Oil 2044, Hard Wax Oil 2055/33 or Hard Wax 2060 are applied.

Surfaces for every taste

Priming

2

Desired surface

Floor Soap 2091 natural / 2092 Floor Soap white

Hard Wax 2060 Waxed appearance

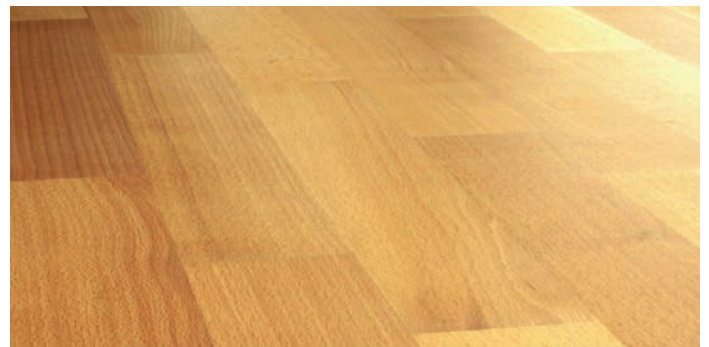

Universal Hard Oil 2044 semi mat / layer-forming

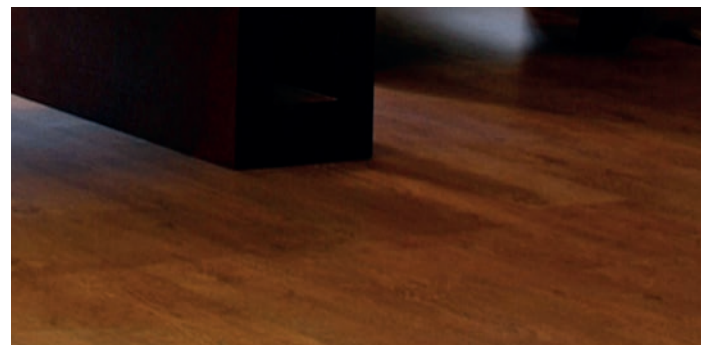

Hard Wax Oil 2055 semi gloss / layer-forming

Hard Wax Oil 2033 mat / layer-forming

Parquet Oil Special 2059 solvent-free / non-layer-forming

Color Oil 2110 solvent-free / non-layer-forming

These natural surfaces are tangibly different from anything you know ...

BIOFA Hard Wax Oil 2055 semi gloss / 2033 matt

BIOFA Hard Wax Oil is suitable for all interior wood, especially for parquet and cork. The natural composition of natural oils, waxes and tree resins does not require linseed oil and therefore does not stain the wood as much. The wax gives the surface a silky matt lustre and also protects the surface from wear and tear. The product is easy to apply with a roller or brush and dries to a silky matt finish. The thin oil film that forms after the second coat protects the surface from moisture and dirt. The surface fulfils DIN 68861 (stain resistance) and DIN 53754 (abrasion).

BIOFA Universal Hard Oil 2044

BIOFA Universal Hard Oil is suitable for all interior wood, especially parquet and cork. The natural composition of natural oils and resins combines the properties and appearance of an oil with the performance of a varnish. This product has been specially developed for DIY and professional craftsmen and is the perfect product for customers who want to switch from a lacquered surface to an oiled surface. The product is easy to apply with a roller or brush and dries to a matt finish. The thin oil film that forms after the second coat protects the surface from moisture and dirt.

BIOFA Hard Wax 2060

BIOFA Hard Wax is a high-quality, natural wax mixture of beeswax and carnauba wax. It protects and cares for indoor furniture and floors. The hard wax is easy to apply, colourless, diffusible and has a pleasant, mild odour. The surface is semi-glossy, non-slip, treat-resistant and antistatic. Suitable for all untreated, hardwoods and softwoods or those pre-treated with waxes, stains and oils.

The traditional hard waxes and oils are "the" classics

BIOFA Color Paste White 2058

is suitable for tinting Universal Hard Primer 3755, Parquet Oil Special 2059, Worktop Oil 2052 and Furniture Oil 2049. The paste can be used with up to 10% added and gives light-coloured woods in particular a naturally light character.

Parquet oil preserves the original character of the wood ...

BIOFA Parquet Oil Special 2059

BIOFA Parquet Oil is suitable for all interior parquet flooring. The natural composition of boiled wood oil and sunflower oil gives the wood a natural colour. The resins and waxes form a thin film on the surface that protects against dirt and moisture. The product is completely VOC-free and produces a finished surface after 1 to a maximum of 2 coats. The surface fulfils DIN 68861 (stain resistance) and DIN 53754 (abrasion).

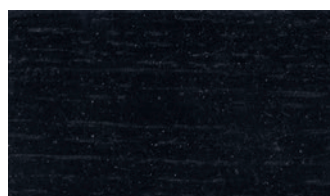

NEW FORMULA
with hemp oil

BIOFA Color Oil solvent-free 2110

BIOFA Color Oil is suitable for coloring parquet, wooden furniture and cork. The natural composition of natural oils and pigments gives the wood an individual color expression without covering the wood grain. A top coat can be applied with all colorless oils or varnishes from BIOFA. Surfaces treated with BIOFA Color oils are durable and long-lasting, as the pigments can be absorbed into the wood surface with the oil and are therefore not just on the surface of the wood, but anchored in the wood.

And if you want your stone floor to be a little more colorful...

BIOFA Stone Oil 2100 colorless, 21001 colored

BIOFA Stone Oil is a special oil for interior mineral floors. The composition of natural resins and oils provides the stone with natural protection against moisture and dirt. The oils penetrate the surface during the first application and form a deep protection. The second application protects the surface with a thin film. The perfect product as an alternative to tiles! Thanks to our mixing systems, we can offer this product in many RAL colors.

Priming with BIOFA Universal Wood Primer 3754

BIOFA Universal Wood Primer is a quick-drying primer for all interior wood, cotto tiles and highly absorbent stone tiles. Thanks to its natural composition of linseed oil, the hard primer provides optimum saturation of the substrate before further coats of Universal Hard Oil 2044, Hard Wax Oil 2055/33 or Hard Wax 2060 are applied.

BIOFA NACASA Universal Cleaner 4010

is suitable for the gentle and mild cleaning of oiled, waxed, varnished and lacquered surfaces of floors, window frames, doors, tiles, tiles, wood, plastics, etc. It is particularly kind to the skin and biodegradable. It is particularly skin-friendly and biodegradable, without chemical preservatives and free from chlorine, ammonia and phosphate.

BIOFA Household Cleaner Spray 4020

is a ready-to-use, diluted, very mild and gentle cleaning spray. It is simply sprayed on and wiped off with a cloth.

BIOFA NAPLANA 2085 and NAPLANA Plus 2086 Care Emulsion

are made from natural raw materials, are suitable for basic and maintenance care and protect varnished, waxed and oiled floors, furniture surfaces etc. from dirt and mechanical abrasion. 2085 is also suitable for smooth leather and other surfaces. After a short drying time, NAPLANA produces a silky gloss surface without polishing. The treated surfaces are refreshed, diffusible and dirt-repellent. 2086 NAPLANA Plus also has an anti-slip effect. Regular maintenance significantly extends the service life of the floor. NAPLANA can be polished by machine after drying.

BIOFA Wax Care Spray 4030

is a ready-to-use, diluted care spray. Simply spray on and spread. It protects and cares for oiled, glazed, varnished and waxed surfaces and produces a silky gloss finish without polishing.

„natural“ especially in the garden ...

BIOFA Teak Oil 3752

BIOFA Teak Oil is suitable for the treatment of untreated and for the care of already oiled wooden garden furniture. The natural oils such as linseed oil protect the furniture and water runs off the surface. The surface is permanently protected by regular re-oiling.

BIOFA Terrace Cleaner

for wood and stone

2019

is a biodegradable, highly effective intensive cleaner and green film remover for untreated or oiled wooden surfaces in outdoor areas as well as for surfaces made of plastic, composite materials, stone, concrete, Eternit, roof tiles and paving slabs. This powerful and versatile cleaner is free from chlorine, ammonia, chemical preservatives, phosphates and formaldehydes.

BIOFA Wood Grey Remover 2089

BIOFA Teak Oil is a special cleaner for removing grey haze from outdoor wooden surfaces. Thanks to its natural composition, it removes grey haze from wooden facades, furniture and terraces.

In outdoor areas, the wooden surfaces can then be treated again with BIOFA Teak Oil, Weather Protection Oil or Decking Oil.

BIOFA Decking Oil 3753

BIOFA Decking Oil is suitable for treating untreated and maintaining already oiled wooden decking boards. The natural oils such as wood oil protect the decking against weather and UV. The surface is permanently protected by regular re-oiling.

before afterwards

„natural and colorful“
on the Façade too ...

BIOFA Weather Protection Oil 2043, 20431

BIOFA Weather Protection Oil is a transparent natural resin oil for weathered wooden surfaces in outdoor areas. It revives and preserves the natural structure of the wood, protects against moisture and delays the typical greying process. It has been specially developed for the basic treatment and maintenance of non-horizontal, sanded, planed and rough sawn wood in outdoor areas such as façades and screens, etc. The weather protection oil contains a film preservative against fungal and algae infestation.

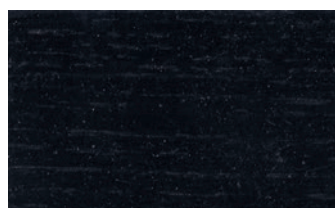

For better UV protection and a longer service life, we recommend using the coloured weather protection oil.

Wood, as original as possible ...

BIOFA Furniture Oil 2049

is ideal for treating untreated wooden furniture and for maintaining furniture that has already been oiled. The natural composition of Soya bean oil and beeswax gives the wood a silky matt lustre. The surface is antistatic and therefore does not attract dust. The surfaces are easy to clean and maintain. The furniture oil has been tested for indoor climate at the ECO Institute in Cologne and has been proven not to release any substances that could harm the environment.

- colourless + solvent-free
- revitalises and deepens the natural structure of the wood
- economical
- hard-wearing
- pleasant to the touch
- easy to maintain
- diffusible

BIOFA Natural Shellac Refiner 5005

The very quick-drying BIOFA wood finish 5005 based on shellac is odourless and is therefore particularly suitable for interior furniture surfaces such as drawers and cupboard compartments.

BIOFA Worktop Oil 2052

BIOFA worktop oil is perfect for treating untreated and maintaining already oiled wooden tables and kitchen worktops. The natural composition of boiled wood oil and tree resin protects the surface perfectly against any liquids. The product has been specially tested by the Wessling GmbH Institute for food safety and can be used in contact with food without any problems. Regular re-oiling stabilises the resistance of the surface.

- solvent-free
- colourless
- revitalises and deepens the natural structure of the wood
- diffusible
- easy to maintain
- good stain resistance
- meets EN 71 Part 3 (children's toys)
- is food-safe

Maintenance tip

BIOFA Wax Balm solvent-free 2063 is a paste that saturates the uppermost wood pores thanks to its natural composition of wood oil and carnauba wax and also protects the surface against wear. Particularly suitable as a finishing product for BIOFA Parquet Oil special 2059 and BIOFA Furniture Oil 2049 surfaces to achieve a higher gloss level.

Colors make life more colorful ...

BIOFA Color Wax 2087

semi gloss is low-emission and consists of 97% renewable and mineral raw materials. Colorwax is available in various colour shades whose durable colour pigments guarantee high UV resistance. The high wax content ensures a dirt and water-repellent surface and adapts flexibly to the needs of the wood. Colour wax complies with the children's toy standard EN 71 (Bureau Veritas) and is certified by the Eco Institute.

Renovating without sanding...

BIOFA Intensive Oil Cleaner 2057

was specially developed for easy cleaning of old oiled surfaces. Thanks to its natural composition of natural oils and purified solvents, the old, soiled floor can be renewed through intensive cleaning. This product eliminates the need to sand down the floor.

Using a green pad, the oil removes dirt from the wood pores without creating dust. After cleaning, the floor can be treated with BIOFA Hard Wax Oil 2055, Universal Hard Oil 2044 or Parquet Oil 2059.

afterwards

Maintenance tips for your living area

Cleaning oiled or waxed surfaces

BIOFA NACASA 4010 or BIOFA Household Cleaner Spray 4020 are pH-neutral cleaners especially for oiled or waxed surfaces. They clean gently without affecting the gloss level of the surface.

For the maintenance of all surfaces

BIOFA NAPLANA 2085 or BIOFA Wax Care Spray 4030 are water-based wax emulsions for the care of all household surfaces. They form a thin protective film on the surface that protects it from abrasion.

BIOFA NAPLANA PLUS 2086 is an anti-slip self-shine emulsion.

For heavily soiled floors

BIOFA NAPONA 2090 is a skin-friendly intensive cleaner. Its natural composition enables an intensive cleaning effect on all surfaces from wood to stone.

Protective finish product / high gloss level

BIOFA Wood Finish 2063 is a VOC-free wax. It protects the surface from wear and is particularly suitable as a finish for surfaces treated with BIOFA Parquet Oil 2059 and BIOFA Furniture Oil 2049 to achieve a higher gloss level.

Special hard wax for furniture and floors

BIOFA Hard Wax 2060 is a special hard wax for furniture and floors. It forms a hard-wearing film on the surface. BIOFA Hard Wax can be used as a top coat on all oiled surfaces.

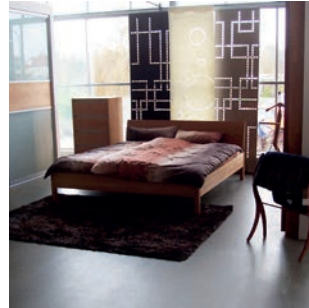

Numerous references for 40 years speak in favour of the extraordinary quality of BIOFA products.
